EXPERIENCE

REACT FRONT-END ENGINEER

React Flicks:
React / Redux / Sass / Hooks / TMDB API / React Router

Visit Project: react-flicks.herokuapp.com

An app that uses the movie database API in order to display movie information to the user which includes run-time, crew, rating, budget, and revenue.

React Merch:
React / Redux / Sass / Firebase / Sagas / React Router

Visit Project: react-merch.herokuapp.com

An e-commerce site that allows users to sign-up and log-in using a custom account or a Google account. Their shopping progress will be remembered even if they close the app so users can continue where they left off when they come back and are ready to checkout.

SUMMARY

Web Development has offered an engaging challenge to continuously learn, build, and adapt to the world of programming. What started with a simple "Hello World" has become and full-fledged passion that only gets more exciting as time goes by. Feeling job-ready, two of my best projects out of several are displayed for viewing within my portfolio. These projects showcase what I've been able to learn and achieve throughout my programming journey thus far.
